

■ Gemini API Key Setup Guide

Follow this interactive guide to generate your Gemini API Key in just a few minutes.

■ What You'll Need

- A Google Account
- Access to Google AI Studio
- An imported Google Cloud Project

■ Step-by-Step Instructions

Step 1: Open Gemini API Docs

Visit the Gemini API documentation and click 'Create or view a Gemini API Key'.

Step 2: Sign In

Login using your Google account.

Step 3: Open AI Studio

You will be redirected to Google AI Studio.

Step 4: Navigate to API Keys

Click API Keys from the left menu.

Step 5: Create Key

Click the Create API Key button in the top-right corner.

Step 6: Select Project

Choose your imported project (e.g., AnkitTestPro).

Step 7: Generate Key

Confirm and create the key.

Step 8: Copy & Save

Copy the API key and store it securely.

Step 9: Use Securely

Use environment variables and never expose keys publicly.

Gemini API Documentation Page

The screenshot shows the Gemini API documentation page for API keys. The browser address bar displays a URL with tracking parameters. The page header includes the Gemini API logo, a search bar, and navigation links for 'Get API key', 'Cookbook', and 'Community'. A left sidebar contains a navigation menu with categories like 'Get started', 'Models', and 'API keys', with 'API keys' currently selected. The main content area features a blue banner for 'Gemini Deep Research', a breadcrumb trail, and a dropdown menu set to 'generateContent API'. The title 'Using Gemini API keys' is followed by a paragraph explaining authentication and a prominent blue button labeled 'Create or view a Gemini API Key'. Below this, the section 'API key types: Standard versus Authorization' explains the transition from standard to authorization keys. A list of key types follows: 'Standard API keys' (for billing/quota) and 'Authorization (auth) keys' (bound to a Google Cloud account). A right sidebar titled 'On this page' lists various topics like 'API key types', 'Managing API keys', and 'Setting up your environment'. The bottom of the page shows a Windows taskbar with various application icons and system status information.

Using Gemini API keys

To use the Gemini API, you must authenticate your requests. You can authenticate using a standard or authorization API key.

Create or view a Gemini API Key

API key types: Standard versus Authorization

API keys provide access to the Gemini API, but their security characteristics differ. The Gemini API is transitioning from standard API keys to authorization keys to improve security:

- Standard API keys:** Associate requests with a Google Cloud project for billing and quota purposes. Standard keys don't identify a caller, which limits the granularity of permissions and access control they can support.
- Authorization (auth) keys:** Bound directly to a Google Cloud service account. When you use an

Create New API Key Dialog

The screenshot shows a 'Create a new key' dialog box overlaid on a blurred background of the Google AI Studio interface. The dialog has a title bar with a close button (X) in the top right corner. Inside the dialog, there is a section titled 'Name your key' with a text input field containing 'Gemini API Key 2'. Below this is a section titled 'Choose an imported project' with a dropdown menu showing 'AnkitTestPro'. At the bottom right of the dialog are two buttons: 'Cancel' and 'Create key'. The background shows a table with columns 'Project' and 'Created', and a button 'Import projects' at the bottom.

■ Security Tips

- Never commit API keys to GitHub.
- Store keys in environment variables.
- Rotate keys if they are exposed.
